

SUBMITTAL SHEET

PIC FLAT SHEETS AND CORRUGATED PANELS

PIC Flat Sheets and Corrugated Panels are made from the same high quality PVC compound as our jacketing and fittings. (see FG Series Fittings and Jacket submittal sheets for more information).

PVC Sheets

Sheets have good fabricating properties and can be easily trimmed for a variety of job site applications including tank heads and duct work. Straight and curved segment right angle also available to professionally complete the job.

White

Dimensions - 48½" x 97¾"

Available Thicknesses (in inches) - .018, .025, .031, .034, .040, .045

Color

Dimensions - 48" x 77"

Thickness (in inches) - .032

PVC Corrugated Panels

Lightweight Corrugated Panels are used for protection on insulated tanks and vessels or anywhere expansion and contraction can occur that would normally stress flat sheets. Corrugations run the length of the panel and are spaced 1¼" apart with a depth of ¼".

White

Dimensions - 71" x 43"

Available Thicknesses (in inches) - .028, .040

Color

Dimensions - 71" x 43"

Thickness (in inches) - .032

Color for indoor use only
